Detailed Features

HAPPY HCR Machines are Office-Friendly

While HAPPY HCR Multi-head machines are built for big production and high durability, they're also designed to be easy to work with:

- New color control panel with built-in help makes the machine easy to learn, and simplifies operations and maintenance
- Quieter, smoother operation - the quietest HAPPY multi-head line ever
- Compact design allows even the largest model HCR to be wheeled easily through a standard 3' door

Narrow Cylinder Arm

Reduced diameter of cylinder arm improves the ability to embroider on traditionally tight areas, such as pockets, sleeves, pant legs, children's wear, and more.

Storage Media

- Compact Flash
- SD Card
- Memory Stick
- Smart Media
- USB (Jump) Drive
- (Optional) Floppy Disk DrivePC Connection Ports

- Ethernet (LAN) Port
- USB Port
- Serial PortDesign Trace

Optional Laser Marker

- Displays sew point on the garment for accurate trace
- Spot actual sewing location on garment with confidenceFrame Selection Menu
- Choose a hoop on-screen
- Accurately check/adjust design fit and position in the selected hoop

Memory Capacity

Built-in memory capacity of 2,000,000 stitches or up to 250 multi-color designs and their custom settings.

New Thread Control System

- The thread break sensor and the thread tension control unit are combined, improving upper thread feed and tension control
- Independent take-up springs improve over-all sewing quality
- Control panel settings allow the machine to better handle different types of thread sewing together on the same design i.e. metallic + polyester, or other combinations.
